Differentiation document:

Feature 1: display truck location on the map
After the user enters the tracking number, he can view the current location of the truck on the map. The map will also show the location of the destination and warehouse.

Feature 2: email the user when the package is delivered

Feature 3: allow the user to add packages to his account

If the user didn't place the order with his ups account, he can later log in to his account and use the tracking number to add the package to his account.
